React Native Test Sheet

Write a calculator app like the picture above with these criterias:

1. Use the latest expo to create the project
2. Use redux
3. src only contains: constants.js, actions.js, reducer.js, Button.js, Screen.js, styles.js
4. Write styles.js without **width** / **height** key
5. Write Button.js as **React.memo** without equal function and make sure it's not rerender

6. Write your logic inside reducer in such a way that $1+2-3*4=$ will result as 9 (not 0)

User input		1	+	2	-	3	*	4	=
Display value	0	1	1	2	2	3	3	4	-9

7. If user input multiple operator, use the last one
8. Plus point if each file is less than 60 lines. Use prettier to format your files
9. Plus point if you use regex
10. Plus point if you write unit testing with coverage > 80%

Put your code to github and send us the link.
